Vice President for Business Affairs

SUBJECT: Conservation Area Land Management Plan Steering Committee

I am writing to confirm your selection to serve on the Steering Committee for the update of the campus Conservation Land Management Plan and to thank you for this service. The University is fortunate to benefit from the wealth of knowledge available from experts like you. With over 450 acres of conservation lands on campus, these natural resources are an important asset to the university's teaching, research, and unique campus experience. I look forward to receiving your recommendations for how we can manage these lands in a responsible and sustainable way. We intend for this effort to be concluded within a year, so please know that I truly appreciate your dedication to this initiative.
