

DID YOU KNOW?

There are 31 conservation areas on the main campus of the university, encompassing 455 acres?

You can enjoy general recreation such as walking, practicing mindfulness, and socializing in these unique spaces?

These areas support wildlife habitats, biodiversity, and academic teaching opportunities?

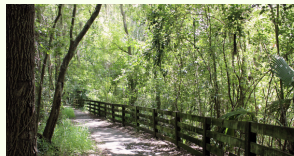

CONSERVATION ON CAMPUS

The University of Florida is committed to preserving and enhancing campus natural areas!

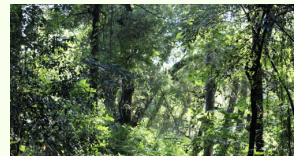

The main campus conservation areas benefit the university through stormwater treatment and flood control and are part of the larger ecological network in Gainesville.

The protection of these areas ensures existing ecological networks remain intact and native wildlife can thrive on campus!

CAMPUS CONSERVATION AREAS

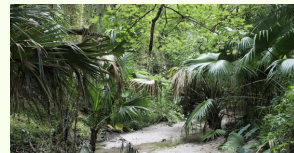

REITZ RAVINE
